Stay seated or hold the handrails (if standing) before the bus moves or is in motion.

Take extra care on bus steps or the bus floor in wet weather.

Accessibility

At Palm Tran, we believe that transit is for everyone. We're proud to offer services that are accessible to all of our South Florida community.

Accessibility features are available to any Palm Tran rider when boarding or exiting, upon request to the Bus Operator.

Accessibility features

Fixed-Route buses are equipped with wheelchair ramps and the ability to lower or "kneel" at the curb.

Our buses are also equipped with mobility securement areas. All mobility devices are required to be secured by Palm Tran Operators when utilizing Palm Tran services.

Transfer points, major intersections and major destination points are announced on board the bus with an automatic stop announcement.

Priority Seating & Portable Devices

The front seats of the bus are to remain open for senior citizens or passengers using wheelchairs, scooters, walkers, or any power-driven mobility device.

Service Animals & Portable Devices

Service animals will be allowed to board. A service animal shall mean any guide dog, signal dog, or other animal individually trained to work or perform tasks of an individual with a disability. The work or task performed by a service animal must be directly related to the individual's disability.

Individuals with disabilities who use portable oxygen devices are allowed to travel with respirators and properly secured portable oxygen supplies. Oxygen supplies must not obstruct the aisle.

Boarding with a mobility device / Quantum

1. Wait in view of the operator:

Wait by the bus stop where the operator can see you. That way when your bus arrives, the operator will know to deploy the ramp which helps save time.

2. Boarding the bus:

You may board the bus by either facing toward the bus or away from the bus when using the ramp, whichever is easier for you.

3. Priority seating and securement areas:

On board, look for priority seating area near the front of the bus. Two securement areas are provided for mobility devices. Some buses have a contactless wheelchair securement system installed. See page 21 for specific directions of how to use this device.

4. Transfer to a seat:

For your safety, you may prefer to transfer to a seat, as it may be difficult to safely be secured within some mobility devices. It is your choice to transfer or remain in your mobility device.

5. Press the signal strip to request a stop:

About one block from your stop, press the plastic strips tape on the flip up seats in the wheelchair securement area. This signals the operator that you want to get off at the next stop.

6. Getting off the bus:

When the bus stops, the operator will remove the securement straps from your mobility device if secured, and deploy the ramp.

This material is available in alternative formats for individuals with disabilities upon request. Please contact Palm Tran Connection's administrative office at 561-649-9848. For the hearing impaired, please call 1-800-955-8771 to obtain a Rider's Guide.

Bikes on Buses

Palm Tran fixed route and Go Glades buses can conveniently accommodate 2 bikes on racks located at the front of the bus.

Space is available on a first-come, first-serve basis. Riders have the responsibility to ensure the bike is properly secured to the rack.

Don't forget your bike! Let your driver know that you are retrieving your bicycle when you've reached your destination.

Algunos autobuses tienen un sistema automático sin contacto instalado para asegurar sillas de ruedas. Vea la siguiente página para encontrar instrucciones específicas de cómo usar este sistema.

4. *Transferencia a un asiento:* Para su seguridad, usted puede preferir irse a un asiento, ya que puede ser difícil de asegurar al pasajero a un dispositivo de movilidad si está sentado (a) en el dispositivo de movilidad. Es su elección transferirse o permanecer en su dispositivo de movilidad.

5. *Presione la tira plástica para solicitar una parada:* Mantenga los artículos de mano fuera del pasillo, incluidos los carritos y las carriolas. Si es posible, doble las carriolas y carritos. Aproximadamente a una cuadra de su parada, presione la cinta de tiras de plástico en los asientos plegables en el área de seguridad de la silla de ruedas. Esto le indica al operador que desea bajarse en la siguiente parada.

6. *Bajar del autobús:* Cuando el autobús se detenga, el operador quitará las correas de sujeción de su dispositivo de movilidad si está asegurado, y desplegará la rampa.
