

INTRODUCTION/BACKGROUND

In June of 2016, the Center for Urban Transportation (CUTR) was commissioned to analyze Palm Tran's performance measures and benchmark peer agencies. CUTR provided a detailed review of Palm Tran's performance metrics and made several presentations to the Executive Leadership Team and the Palm Tran Service Board (PTSB). As a result of CUTR's benchmarking Palm Tran against nine (9) peer agencies; metrics, targets and goals were recommended. These recommendations serve as the basis for the creation of Palm Tran's performance monitoring and improvement process. The Performance Management Office (PMO) was launched in October 2016 as part of Palm Tran's reorganization. The PMO is responsible for producing monthly reports using the Balanced Scorecard Approach, which reviews and analyzes key performance indicators across both fixed route and paratransit operations.

Each metric on the balance scorecards, referred to as "dashboards", is represented as a trend analysis comparing month to month. It also compares current performance to the prior fiscal year. These metrics reflect Palm Tran's commitment to monitor progress towards fulfilling its Vision, Mission, and Core Values. The report provides an annual comparison, and is utilized by the Executive Leadership Team (ELT) and the Palm Tran Statistics (PT-Stat) teams to monitor performance and recommend future improvement initiatives. This process culminates at the PT-Stat Forum where recommendations are presented to the Executive Leadership Team (ELT) for approval to be implemented.

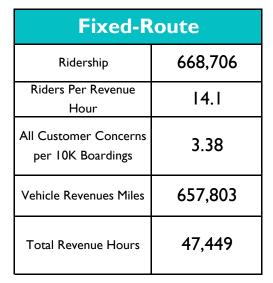

JULY 2025

PERFORMANCE HIGHLIGHTS

| Connec | tion |
|------------------------------------|---------|
| Ridership | 66,370 |
| Riders Per Revenue Hour | 1.40 |
| All Customer Concerns per 1K Trips | 1.68 |
| Vehicle Revenue Miles | 849,195 |
| Total Revenue Hours | 47,497 |

| Go Gla | ades |
|---|----------------|
| Ridership | 12,964 |
| Riders Per Revenue Hour | 4.78 |
| All Customer Concerns per 1K Boardings | 0.08 |
| Vehicle Revenue Miles | 4 5,317 |
| Total Revenue Hours | 2, 710 |

Through Palm Tran's *PT-Stat* program, Palm Tran continues to make improvements to move the needle in the right direction on metrics slightly below minimum standards. There are a number of initiatives that are ongoing that will continue to improve the overall performance and ultimately will contribute to providing the highest level of service to the residents and visitors of Palm Beach County.

Fixed-Route Total System Ridership

Narrative

During the month of July, fixed-route ridership increased by 1.2% as compared to the month prior. The 668,706 figure is a 3.9% decrease compared to the same time period last year (July 2024). The ridership decrease can be attributed to APC issues on Fixed Route vehicles.

Fixed-Route Riders Per Revenue Hour

20.1

Route Revenue Hours

Narrative

The Riders per Revenue Hour metric decreased from 15.4 in June to 14.1 in July. A slight increase in ridership of 1.2% was experienced in July compared to the previous month. However, an increase in revenue hours by 10.8% was experienced, producing a lower productivity rate for the month of July.

Fixed-Route Mean Distance Between Failures

9,000

Top Categories of Mechanical Failures

Narrative

During July, the Mean Distance Between Failures (MDBF) metric increased by 580 miles compared to the month of June. The 9,674 figure is the highest reported since May FY21. The toal number of major mechanical breakdowns reported in July were sixty-eight (68). The top mechanical failure was a tie between "Engine" and "Shut Down / Stalling". The PT-Stat Infrastructure Team is currently investigating the root-cause of breakdowns to alleviate frequent failures and service interruptions.

Connection Riders Per Revenue Hour

Narrative

During the month of July, the riders per revenue hours increased slightly from 1.39 to 1.40. The total number of passengers transported saw a 5.1% increase compared to June while there was also a 4.5% increase in revenue hours reported. These figures produce a productivity rate roughly the same as the month prior.

Connection Mean Distance Between Failures

Top Categories of Mechanical Failures

Narrative

During July, the Palm Tran Connection Mean Distance between Failures is at 9,761 miles; eighty-seven (87) breakdowns were reported as compared to fifty-five (55) the month prior. The top categories of overall breakdowns were related to A/C issues followed by Lift problems. Palm Tran Connection continues working closely with our vehicle vendors to address the situation and repair the buses as expeditiously as possible.

Narrative

Palm Tran is pleased to report that this metric has continued to surpass the established stretch goal. In July, one hundred fifty-two (152) commendations were reported - fourteen more than the month prior. These commendations acknowledge the exceptional efforts of our drivers, reservation agents, and Connection staff. Palm Tran remains committed to pursuing excellence to provide an outstanding customer experience.
