# Accessibility for the Disabled

*Palm Tran believes that transit is for everyone. We're proud to offer services that are accessible to all of our South Florida community.*

All mobility devices are required to be secured by Palm Tran Operators when utilizing Palm Tran services. In accordance with Federal Law 49CFR part 38 – priority seating areas are for seniors and individuals with mobility devices. Please be considerate.

Electronic mobility devices such as stand-up scooters or single-wheel boards are allowed on board as long as they are not obstructing the aisle.

Accessibility features are available to any Palm Tran rider when boarding or exiting, upon request to the Bus Operator.

## **Accessibility features**

Fixed-Route buses are equipped with wheelchair ramps and the ability to lower or “kneel” at the curb.

Our buses are also equipped with mobility securement areas. All mobility devices are required to be secured by Palm Tran Operators when utilizing Palm Tran services.

Transfer points, major intersections and major destination points are announced on board the bus with an automatic stop announcement.

## **Priority seating & mobility devices**

The front seats of the bus are to remain open for senior citizens or passengers using wheelchairs, scooters, walkers, or any power-driven mobility device.

## **Boarding with a mobility device / Quantum**

### *1. Wait in view of the operator:*

Wait by the bus stop where the operator can see you. That way when your bus arrives, the operator will know to deploy the ramp which helps save time.

### *2. Boarding the bus:*

You may board the bus by either facing toward the bus or away from the bus when using the ramp, whichever is easier for you.

### 3. Priority seating and securement areas:

On board, look for priority seating area near the front of the bus. Two securement areas are provided for mobility devices. Some buses have a contactless wheelchair securement system installed.

#### *Transfer to a seat:*

For your safety, you may prefer to transfer to a seat, as it may be difficult to safely be secured within some mobility devices. It is your choice to transfer or remain in your mobility device.

### 4. Press the signal strip to request a stop:

About one block from your stop, press the plastic strips tape on the flip up seats in the wheelchair securement area. This signals the operator that you want to get off at the next stop.

### 5. Getting off the bus:

When the bus stops, the operator will remove the securement straps from your mobility device, kneel the bus, and deploy the ramp.

## Service Animals and Portable Oxygen Devices

Fully trained service animals will be allowed to board. A service animal shall mean any guide dog, signal dog, or other animal individually trained to work or perform tasks of an individual with a disability. The work or task performed by a service animal must be directly related to the individual's disability.

Individuals with disabilities who use portable oxygen devices are allowed to travel with respirators and properly secured portable oxygen supplies. Oxygen supplies must not obstruct the aisle.

*This material is available in alternative formats for individuals with disabilities upon request. Please contact Palm Tran Connection's administrative office at 561-649-9848.*

*For the hearing impaired, please call 1-800-955-8771 to obtain a Rider's Guide.*

# Accesibilidad para discapacitados

***Palm Tran cree que el tránsito es para todos. Estamos orgullosos de ofrecer servicios que sean accesibles para toda nuestra comunidad del sur de Florida.***

Todos los dispositivos de movilidad deben estar asegurados por los operadores de Palm Tran cuando se utilizan los servicios de Palm Tran. De acuerdo con la Ley Federal 49CFR parte 38, las áreas de asientos prioritarios son para personas mayores y personas con dispositivos de movilidad. Por favor sea considerado.

Se permiten a bordo dispositivos electrónicos de movilidad como patinetes o patinetas de una sola rueda, siempre que no obstruyan el pasillo. No se permiten aeropatines debido a problemas de inflamabilidad de la batería de iones de litio.

Las funciones de accesibilidad están disponibles para cualquier usuario de Palm Tran al subir o bajar, previa solicitud al operador del autobús.

## **Funciones de accesibilidad**

Los autobuses de ruta fija están equipados con rampas para sillas de ruedas y la capacidad de bajar o "arrodillarse" en la acera.

Nuestros autobuses también están equipados con áreas de seguridad de movilidad. Todos los dispositivos de movilidad deben estar asegurados por los operadores de Palm Tran cuando se utilizan los servicios de Palm Tran.

Los puntos de transferencia, las principales intersecciones y los principales puntos de destino se anuncian a bordo del autobús con un anuncio de parada automático.

## **Dispositivos de movilidad y asientos prioritarios**

Los asientos delanteros del autobús deben permanecer abiertos para personas mayores o pasajeros que utilicen sillas de ruedas, scooters, andadores o cualquier dispositivo de movilidad motorizado.

## **Embarque con dispositivo de movilidad / Quantum**

### **1. Espere a la vista del operador:**

Espere en la parada de autobús donde el operador pueda verlo. De esa manera, cuando llegue su autobús, el operador sabrá cómo desplegar la rampa, lo que ayudará a ahorrar tiempo.

### **2. Subir al autobús:**

Puede abordar el autobús mirando hacia el autobús o alejándose del autobús cuando use la rampa, lo que le resulte más fácil.

3. Áreas de seguridad y asientos prioritarios:  
A bordo, busque el área de asientos prioritarios cerca de la parte delantera del autobús. Se proporcionan dos áreas de seguridad para dispositivos de movilidad. Algunos autobuses tienen instalado un sistema de seguridad para sillas de ruedas sin contacto.

Traslado a un asiento:

Por su seguridad, es posible que prefiera trasladarse a un asiento, ya que puede resultar difícil sujetarlo de forma segura dentro de algunos dispositivos de movilidad. Es su elección cambiarse o permanecer

en su dispositivo de movilidad.

4. Pulsar la tira de señales para solicitar una parada:

Aproximadamente a una cuadra de su parada, presione la cinta de tiras de plástico en los asientos abatibles en el área de sujeción de la silla de ruedas. Esto le indica al operador que desea bajarse en la siguiente parada.

5. Bajarse del autobús:

Cuando el autobús se detenga, el operador quitará las correas de seguridad de su dispositivo de movilidad, bajará la altura del autobús y desplegará la rampa.

## Animales de servicio y Dispositivos Portátiles de Oxígeno

Se permitirá el embarque de animales de servicio. Un animal de servicio significará cualquier perro guía, perro de señales u otro animal entrenado individualmente para trabajar o realizar tareas de una persona con una discapacidad. El trabajo o tarea realizada por un animal de servicio debe estar directamente relacionado con la discapacidad del individuo.

Las personas con discapacidades que utilizan dispositivos de oxígeno portátiles pueden viajar con respiradores y suministros de oxígeno portátiles debidamente asegurados. Los suministros de oxígeno no deben obstruir el pasillo.

## A Salute for Success!

Palm Tran hosts commencement ceremonies to mark the achievements of new bus operators and officially welcome them to the team. Each graduate undergoes a six-week program of vigorous classroom work, American with Disabilities Act

(ADA) training and on-the-field lessons with an instructor. It is the added emphasis on core values and concentration on safety and customer service that truly transforms a driver into a Palm Tran bus operator.
