Your Bicycle and Palm Tran — A Great Way to Commute!

Palm Tran's “Bikes on Buses” Program allows passengers to take a bicycle on the bus by securing it onto a rack attached to the front of every bus.

Bus operators are not required to physically assist the customer; it is the rider’s responsibility to ensure the bike is properly secured. Palm Tran assumes no liability for damages incurred to bicycles, personal property or persons while using the bike racks.

Buses can accommodate 2 bikes and rack space is available on a first-come, first-served basis.

No Age Requirement • No Additional Charge • No Permit Needed

Loading & Unloading Instructions

To Load:
1. Prepare your bike by removing any detachable or loose items. Inform the bus operator that you will be loading your bike.
2. Squeeze and pull up on the silver latch and pull down the folded rack. Only one hand is needed for this operation while your other hand can hold onto the bike.
3. From curbside, load your bike onto the rack, fitting the wheels into the designated slots. Each slot is clearly labeled.
4. Finally, raise the support arm over the front tire to secure the bike. The support arm should be resting on the tire.

To Unload:
1. When departing the bus, remind the bus operator that you are removing your bike, and leave through the front door.
2. When unloading your bike, raise the support arm off the tire. Move the support arm down out of the way.
3. After lifting your bike out of the rack, please return the rack to the upright position if there isn’t another bike in the rack.
